Supervising Surveyors Checklist

No	ITEM	CHECKED
1	Visited the site with the candidate and provided guidance as required.	
2	Overseen the progress of the candidate's project work by regular review and consultation.	
3	Does the candidate understand their project and the legal and practical reasons for the survey definition or design outcome as appropriate for that exam?	
4	Can the candidate justify the survey or design decisions contained in their plans and documents?	
5	Has the candidate completed the Notice of Practical Experience and submitted it to BOSSI at least every 12 months and, if required, is it up to date for the current exam period.	
6	Look at the guidelines for the particular exam:	
7	Does the project comply with the guidelines?	
8	Has the candidate fulfilled experience requirements?	
9	Does the candidate have all the documents and plans required to be presented?	
10	Are the documents and plans presented to a professional standard acceptable for either lodgement at the LPI or a relevant authority?	

- Do we have the right CPD requirements?
 - Is 15 points enough?
 - Is 3 cadastral enough?

- Items for consideration
 - Mutual recognition
 - Town planning and engineering

Land Survey Definition

Under the Act: land survey means a survey (other than a mining survey) that is carried out in connection with:

- (a) the reservation or dedication of land for any purpose, or
- (b) the creation, variation, transfer or extinguishment of any interest in land, or
- (c) the preparation of a plan for lodgment under Division 3 of Part 23 of the Conveyancing Act 1919, or
- (c1) the preparation of documents required to be prepared under the Strata Schemes Development Act 2015 by a registered land surveyor, or
- (d) the identification or marking out, or both, of the boundaries of a parcel of land.**

This definition does not mention “identification survey”. ‘Land survey’ is not restricted to plans lodged at LPI or ident / pegout / re-mark surveys.

It includes any survey plan or sketch identifying boundaries.

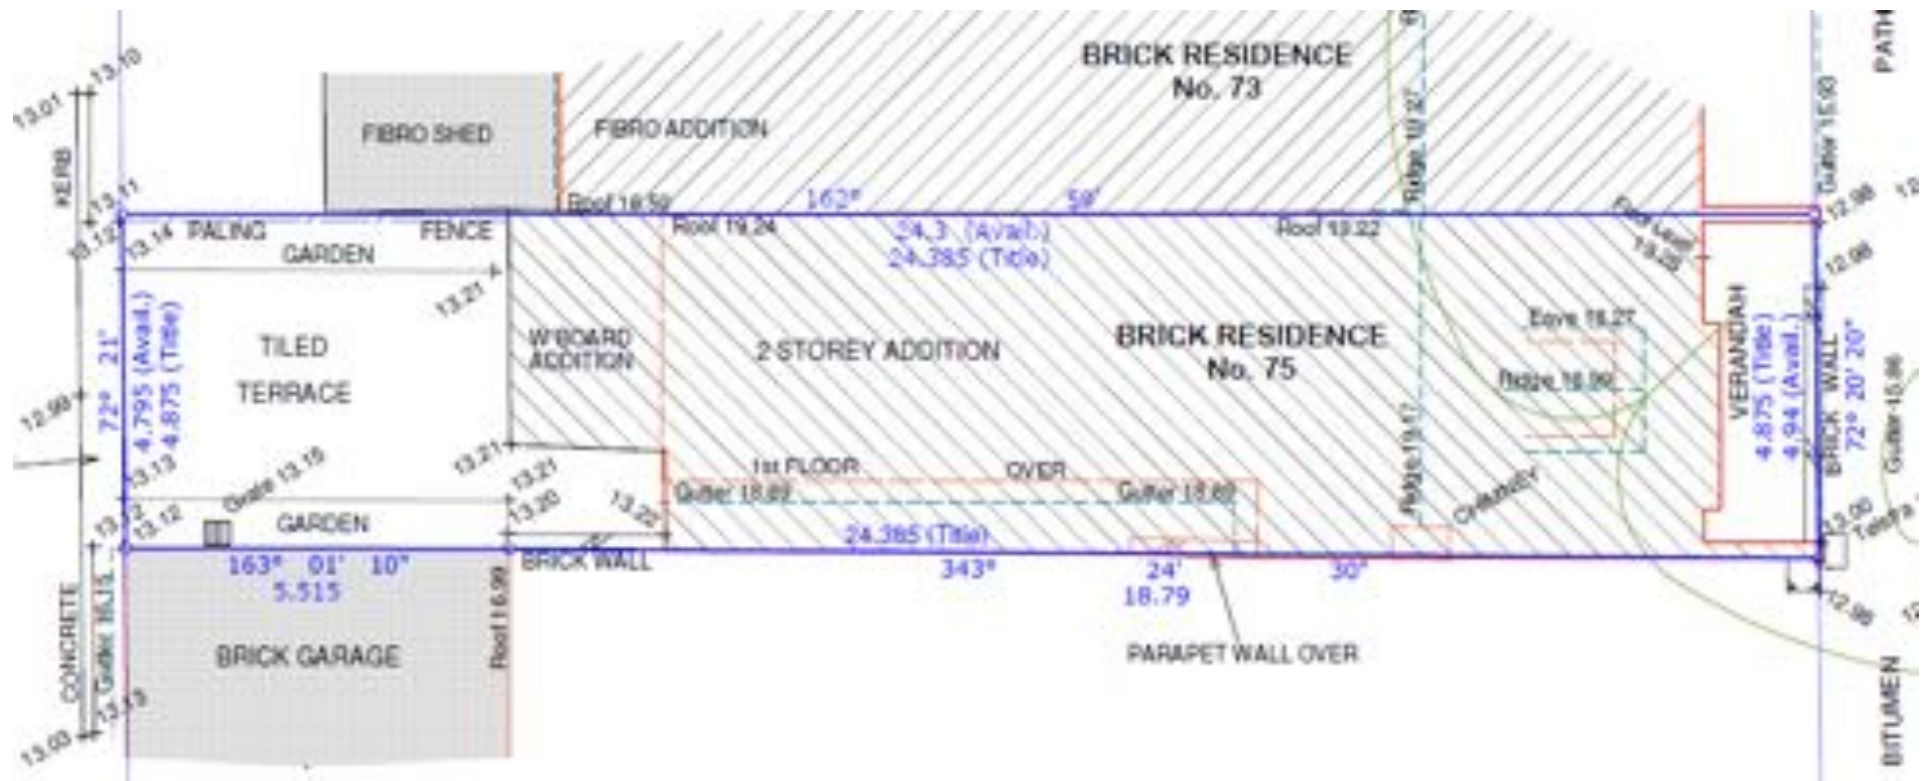

Land Survey Definition

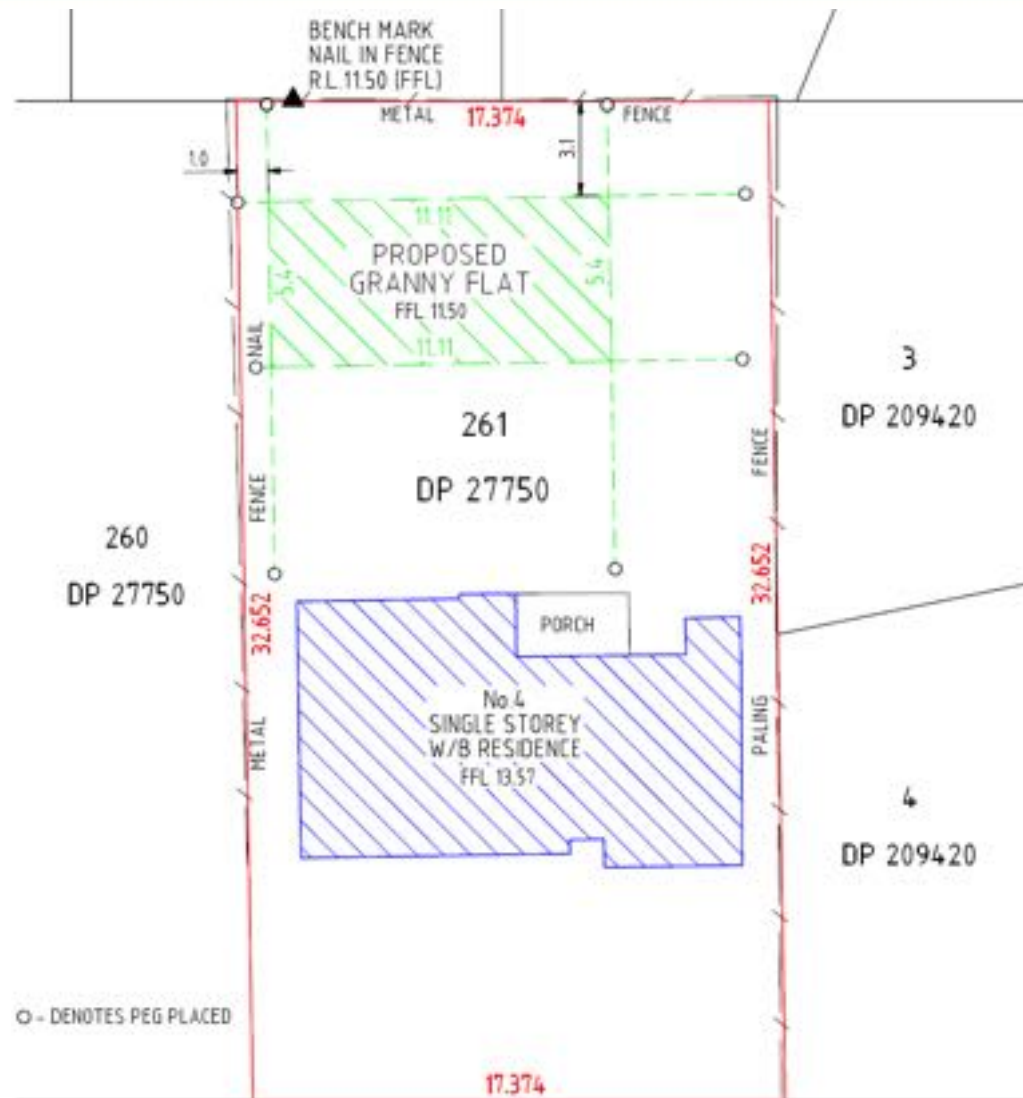

- If you undertake a survey and prepare a plan that identifies land boundaries, that part of the survey and plan is a 'land survey'.
- The identification of land boundaries means that the boundary is identified by, for example:
 - Bearings and distances
 - Offsets from structures

Do disclaimers cover you or remove your liability?
