

## Enhancing Search of Historical Records

The topic for Angus's presentation will be "**Enhancing Search of Historical Records**"

Angus will demonstrate additional feature of the new map system within ACSV Search with particular focus on historical records.

At the end of Angus's presentation which will take approx. 15 mins, I will provide a 5 min update on Spookfish imagery.

Hopefully you will have an existing copy of Angus's bio from the last conference.
